Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is final. Claims 8-15 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 8-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen (3,817,111).

Allen shows a screw (180) and nut (160) device (figure 10) where the nut can be released from the screw (position of figure 10) which allows the nut to travel along the screw for coarse positioning and then the nut is re-engaged to provide for fine positioning of the device.

Response to Arguments

4. Applicant's arguments filed 3/19/07 have been fully considered but they are not persuasive.

Applicant argues:

" ... Allen does not anticipate Applicant's invention. Specifically, Allen recites a mechanism that consists of a pair of threaded levers and a bar member with an oblong cross-section. The rotation of this bar member connects and

Art Unit: 3682

disconnects the threads of the levers and the thread of the adjusting rod. It is the frictional action of this bar member over the levers that maintains the threads of the adjusting rod and levers connected while the device is positioned by the rotation of the adjusting rod. The device of the present claims does not contain these elements or function in a manner as claimed by Allen."

It appear Applicant is saying that the Allen reference has more elements than the instant invention. This is not a persuasive argument since the instant claims do not preclude additional elements.

Additionally, the claims of Allen are not what anticipates the pending claims, it is the entire disclosure of Allen.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3682

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively.
